NAME: kamel Mahmoud Ahmed Nail

Id: 20171701076

Department: Bioinformatics

conclusion about the assignment

1. what experiments I tried?

   I tried multiple linear regression and polynomial linear regression

2. why I choose the features?

   The features I choose was (fracture , weight_Kg) , Because these features were the most influential on the column to be predicted (bmd) and in calculating the MSE from it
